

TITLE IV-A COALITION

April 26, 2022

Dear Chairs Murray and DeLauro, and Ranking Members Blunt, Granger and Cole:

On behalf of the nearly 100 undersigned national, state, and local organizations, we urge Congress to please fund the Student Support and Academic Enrichment (SSAE) grant program under Title IV Part A of The Every Student Succeeds Act (ESSA) program at \$2 billion in FY23. This block grant supports investments in safe and healthy students, well-rounded education programs, and the effective use of technology in education.

Title IV-A funds help support comprehensive school health services, including comprehensive school mental and behavioral health services, all of which are critical to support student learning and overall wellness as well as continued recovery from the impact of the pandemic. All of the Title IV-A supported initiatives play a critical role in ensuring a well-rounded education and the necessary comprehensive academic, social-emotional, and mental and behavioral health supports that address the needs of the whole child. Without this critical investment, districts could be forced to choose between offering music and arts instruction, or increasing access to AP courses. Robust investment in Title IV-A helps ensure districts are able to provide a full array of services and learning opportunities that meet the unique needs of their school community. Further, Title IV-A funds improve the effective use of technology in learning including supporting telehealth services and providing professional development for educators on the effective use of technology to keep children engaged in learning, whether in a classroom, hybrid, or virtual environment.

Title IV-A has maintained bipartisan support since its authorization in the Every Student Succeeds Act, in part because of the great flexibility it affords states and districts. Over the last six fiscal years, investments in Title IV-A, have allowed districts to meaningfully invest in efforts that promote a safe and supportive learning environment, and in programs that provide direct educational services to students, including STEM, SEL, AP/IB classes, music and the arts, mental health services, and professional development for technology. In a 2021 survey of over 500 districts, many district leaders reported that these initiatives would not be possible without these funds.

In order to support a safe and healthy school environment and make sure our students receive a well-rounded education that puts them on a path to success, we must continue to invest in our nation’s schools, educators, and most importantly, our students. For these reasons, we urge Congress to fund the SSAE flexible grant program at \$2 billion in FY 2023. Thank you for your consideration of this request. We look forward to working with you to make sure students in every community are supported to reach their maximum potential.

Sincerely,
